WINE and SPIRIT PRESENTATION

WE BOTTLE FOR YOUR SUCCES

innovation and reliability
for every need in the bottling industry

OUR HISTORY

bertolaso

THE COMPANY

The success of our customers is in every bottle

Bertolaso SPA is leader in designing, producing, and installing automatic bottling systems for still and sparkling wine, spirits, beer, fruit juices, water, and drinks.

In business since 1880 in Zimella, near Verona, the Group meets the need of innovation and reliability of large and small producers all over the world.

bertolaso

THE COMPANY

Outstanding competence
responding to specific
needs

The distinguishing characteristics, enabling Bertolaso to reach an International audience, are the design skills and the product expertise that suit the specific needs of each individual customer.

We know that every producer is unique: we do not only design standard machines, but most of all custom-built plants – innovative solutions developed by our di Research & Development team to meet various needs.

bertolaso

THE COMPANY

The presence in the world

International by tradition: five branches and a widespread technical network providing the best service everywhere.

Bertolaso has always run his business with a strong ambition to the International market, with plants installed in every country. Today, Bertolaso exports more than three quarters of his production.

bertolaso

THE COMPANY

A group that grows
alongside the bottlers

All the people employed at Bertolaso share the same passion: the dedication to the projects, the awareness, the will to be proactive, versatile and reactive in looking every day after the customers who have placed their trust in us.

We dedicate a large part of our resources to customer assistance. For them, we are not only a supplier but a strategic partner, with whom they can build a collaboration going beyond the simple supply of machines.

bertolaso

THE COMPANY

For over 135 years
our history is the future

In 1880 in the village of Zimella, (in the Verona countryside), eng. Bortolo Bertolaso founded his company for the wine-making field. The imprinting is clear: a strong drive towards engineering development leads the company to focus on designing machines to cork bottles.

Through four generations, the Bertolaso family widened and diversified their production of bottling machinery, without betraying the pioneering spirit of the founder: a constant commitment to seeking out increasingly advanced technical solutions.

THE SERVICES

Our customer services

The bottler is our partner: his satisfaction is our responsibility.
Here in Bertolaso, we dedicate a large portion of our resources to customer support.

For our after-sales service, we make available to customers a team of specialized professionals equipped with state of the art tools.
Moreover, our consultancy service lasts for the entire product lifetime.

bertolaso

THE PRODUCTS

Flexible in technology,
inflexible in high
performances

Our modular solutions provide high production results, maintaining great accuracy, simple operation, and reliability over time. Bertolaso is a leading manufacturer of complete bottling lines from 1.500 BPH (25 BPM) up to 50.000 BPH (840 BPM) including:

- rinsers, blowers
- gravity, vacuum, and isobaric fillers
- corks and cappers
- spinning machines for alu/tinfoil and/or shrinking plastic capsules
- elevators, feeders and distributors
- bottle conveying systems and lines

RINSERS & BLOWERS

IDRA – for standard bottles (187mL – 3l)

IDRA Dame – for big bottles (3 – 9 l)

IDRA Mignon – for mignon bottles (50 – 100ml)

fixed nozzles

diving nozzles

RINSERS & BLOWERS

Available technologies:

- mechanical (for reliable and repetitive rinsing operation)
- electro-pneumatic (for higher flexibility in rinsing cycle definition and selection)

mechanical version

electro-pneumatic version

RINSERS & BLOWERS

Optional:

- universal grippers for multiple bottle format handling

Vantages:

- significant time saving on each format change-over
- no manual operation

universal grippers for multi formats handling

FILLERS

DOMINA

counter-pressure,
mechanical filler

ELETTRA

counter-pressure,
electro-pneumatic
filler

bertolaso

OLIMPIA FILLER

- gravity, low-vacuum and mechanical filling system
- designed for: still wine and spirit

FOTO EPICA

FOTO EPICA

bertolaso

EPICA FILLER for Wine and Spirit

- low-vacuum and electro-pneumatic filling system
- for still wine (up to 3,0g/l of dissolved CO₂)
- “no-oxygen” option avoiding product air contact
- no nozzle dripping after filling

bertolaso

DOMINA FILLER

- for sparkling wine and still wine
- counter pressure filling system
- valve mechanical opening
- configurable to project specs

bertolaso

ELETTRA FILLER

- for carbonated and still wine
- no foam generation
- no CO2 and alcohol grade loss
- no nozzle dripping after filling
- electro-pneumatic machine

FILLERS - OPTIONALS

automatic dummy bottles

no oxygen configuration

universal handling parts

CAPPERS

SINGLE HEAD
(up to 3,500 BPH)

MULTI HEAD
(up to 50,000 BPH)

COMPLETE BOTTLING LINES & TURN-KEY SOLUTIONS

Based on our bottling experience, we can reliably offer:

- in-line filling level and carton filling check
- integration of third party machines (blow-moulders, capsulers, labelers, "dry part" (depal/pal systems, case packers, conveying, ...), pasteurizing tunnels, external CIP modules, microfiltration system
- complete line layout design
- complete turn-key solutions
- global service and technical support
