

Company Profile

Value to every bottle

Our method,
services and values

bertolaso

**Bertolaso,
renowned worldwide
as a leading provider of intelligent solutions
for every need in the bottling industry.**

We are leaders in designing, producing, and installing automatic systems to bottle still or sparkling wine, spirits, beer, fruit juices, water, and drinks.

In business since 1880 in Zimella, near Verona (Italy), through our “turnkey” systems we provide innovation and reliability to large and small producers around the world.

bertolaso

Our company in seven values.

Our greatest ambition, which we strive to achieve every single day, is making the Bertolaso trademark a brand universally associated with the concept of excellence. This is why we identified seven essential values to guide our choices and our company's business.

b like Bertolaso and branding

Our values are:

1. **Innovation**, intended as ongoing evolution of technological advancements.
2. **Flexibility**, to solve our customers' changing needs.
3. **Ambition**, our desire to be recognized worldwide.

4. **Organisation**, refining internal systems and work dynamics.
5. **Humanity**, enhance the fellowship and dialogue between people.
6. **Passion**, the pride to represent the best of Italian engineering.
7. **Experience**, our wealth of knowledge derived from 130 years in the business.

1 Innovation

2 Flexibility

5 Humanity

6 Passion

3 Ambition

4 Organisation

7 Experience

There is no technology without creativity.

What sets us apart from many of our competitors, and enabled us to reach into an international audience, is our design skills and product-specific expertise. **We don't only produce standard machines, we also craft custom-built products: innovative solutions created to meet our clients' needs.** This is the challenge we take on every day, thanks to the talent and capability of our Research & Development and Engineering Teams.

We know full well that every producer is different to others: every bottle, every cap, every type of wine or drink require a creative effort to develop technologies to make **the bottling process faster, safer, and more efficient.** For this reason our systems are modular: they are flexible enough to accommodate new functionalities, dictated by the requirements emerging in the sector.

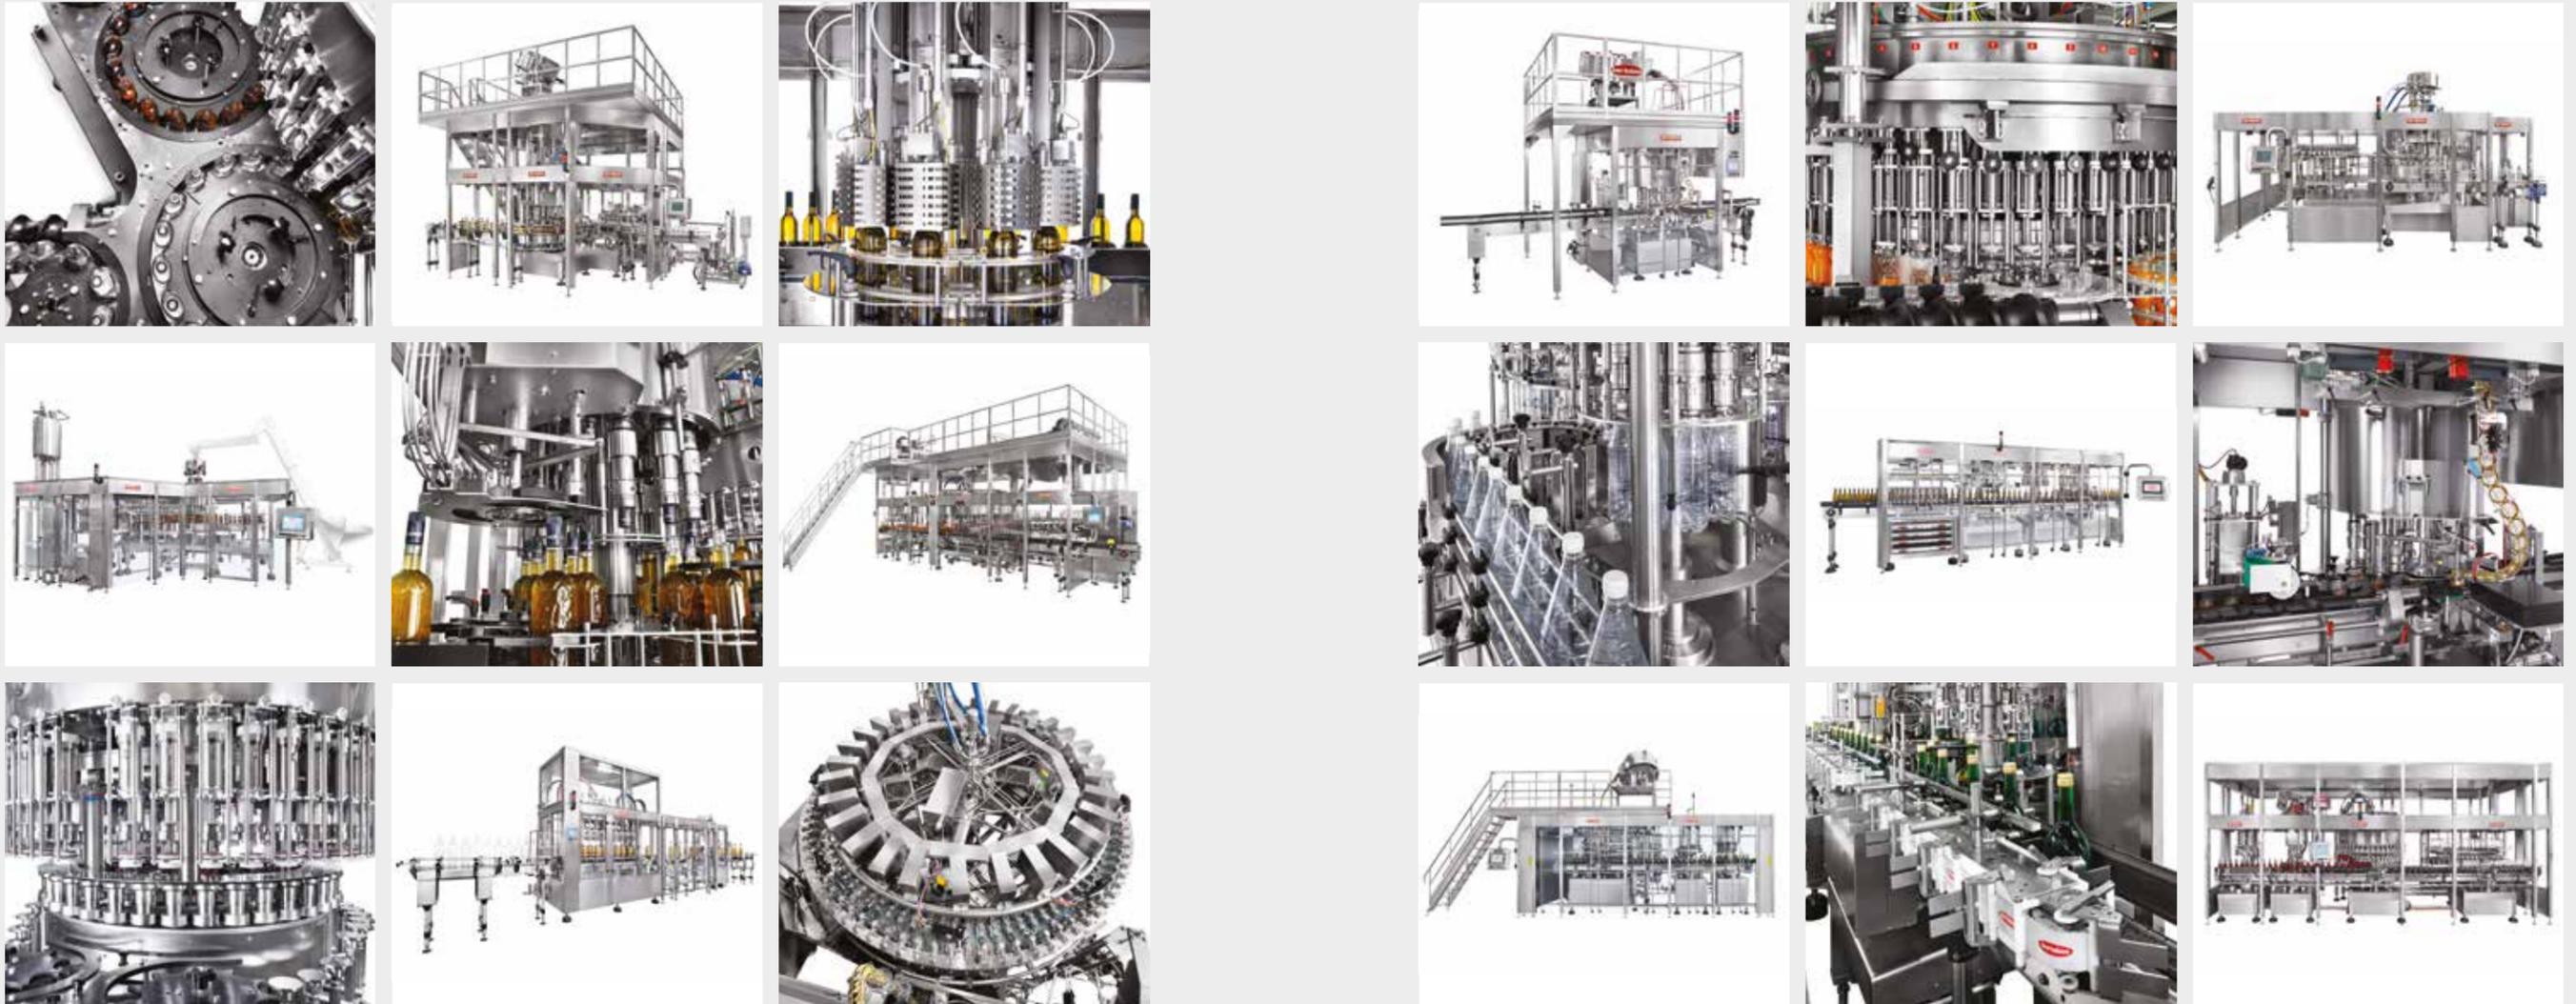

We focus our expert competence and unique experience on our clients' particular needs.

Fillers, rinsers,
corkers, complete
bottling lines:
**we provide flexible
products, and inflexible
precision.**

We design and produce any type of machinery involved in the bottling phases. Specific single-use machinery, such as rinsing, filling, corking and capsuling machines, and **integrated and automatic complete “turnkey” systems.**

Models evolve, but our business philosophy is still the same: create high-technology machinery to ensure **maximum results in terms of high production yields, ease of use, and reliability over time.** For over one hundred years our technology is appreciated all over the world.

Close to producers
around the world:
**international
by tradition.**

**Vast international
experience.**

From champagne to whiskey,
from oriental liqueurs to
new craft beers or fruit
drinks produced in the
Mediterranean regions.
A widespread presence,
with a local workforce,
to provide security to
producers worldwide.

85%
exported production

Our business had always
had an international
inclination, and today we
ship Bertolaso systems
to every country around
the world.

With four branches
and a network of
local distributors and
partners, **our capillary
network guarantees**

**our clients constant
assistance during the
line installation phase
and post-sale technical
services.** From our
distributed warehouses
our replacement parts
are rapidly delivered in
all parts of the world.
We currently export over
three fourths of our total
production.

Assistance and service are the main pieces in our machines.

In our clients
we see partners:
their peace of mind
is our responsibility.

In line with our company's founding principles, **we dedicate a large part of our resources to client assistance.** To our clients we are not mere suppliers, but strategic partners with whom they can build a collaboration that goes beyond the simple supply of machinery. Our main focus is always on service: **we offer our clients specialized staff to provide instruction and training sessions to correctly**

use the new lines. And our customer services last for the entire life-time of the system. We have a team of post-sales representatives ready to respond to our client's requests from across the world. We have a web portal reserved to clients, making our assistance faster and more focused, sending indications to update and upgrade the machines already active.

A group on the rise, alongside our clients.

If there's a trait that we share with all the people that work with Bertolaso, it's passion: the dedication towards projects, the awareness that every one – at every level – is fundamentally important to reach excellent results.

As an authentic group, we comply with an organisation that is shared and clear.

This allows us to be proactive, versatile, and reactive in walking side by side with our clients, every day.

Today our team works in two production units, a few kilometres from each other.

A relevant part of the group is dedicated to R&D.

In addition, we have a direct line with the university and the vinicultural sector: a constant exchange of information, aimed at maintaining the highest standards in research and innovation.

For over 130 years our history is the future.

To understand the evolution our group experienced we need to go back all the way to 1880. In that year in Zimella, a small town in the Verona countryside, Bortolo Bertolaso applied his engineering studies, and realized important innovations in the agricultural sector, introducing the shoulder barrel sulphurizer (an invention that led him to be knighted in the Order of Merit for Labour in 1907). The imprinting is clear: a strong drive towards engineering development leads the company

to focus on designing machines to cork bottles. It is the beginning of a great adventure, one that continues to this day. Through four generations, the Bertolaso family widened and diversified their production of bottling machinery. Never betraying the pioneering spirit of the founder: a constant commitment to seeking out increasingly advanced technical solutions. This is why we can affirm that **our 130 year-long history is not an achievement but a starting point.**
